are instructing themselves about & after Mr & Mrs V this wife
has got the education necessary, they wish then
to get a situation by which they can earn an honest
livelihood in a free country, without fear of molesta-
tion in recommending them strongly not to do the lecturing
their occupation as that find was quite enough
engaged at present. Box Brown I believe is now
in York, but I have not yet seen him; I saw
the papers he had advertised exhibiting his pen-
sions of slavery. I am afraid he will not find
it so successful. Mr Brown has one also exhibiting,
I think there is much better - The Liberty Bell
and the great intestine, I thought it quite equal
to mine, the N. S. Report was also very inter-
esting, particularly the last three or four
lectures, if it is only read by your clergy, they cannot
help feel their consciences smote; I only hope they
will work in the proper reception in this country, if
they will come over this year. I hope you have
some of your coadjutors in the
great cause of emancipation. I hear Mr. Avery of your
city is in England already, I likely visit Leeds, if so
I suspect I must see him, I hear from him all accounts
of both proceedings in Boston; the papers here tell us
your countrymen are coming over by tens of thousands
to the Palace of Industry, last week was announced

that 250000 had already applied for passports from
 France, & this included my few Parisians, the 12th May
 went off I hear very well; Her Majesty opening the
 great exhibition in full state; it must have been a
 splendid sight. I suppose Mrs Chapman will be visiting
 England this summer viz so, shall hope to see her in
 the North; Linton being in London for a week

next month, about Whitsuntide. The letters you are
 have heard from no doubt in this with perhaps late
 news of the drafts &c, as I hear they have been staying in
 Park St as well as N. W. Brown; Mr & Miss Lane indeed
 most energetic; Bristol is well off in having such affairs
 besides the carpenter & the others there; I wish we had one in
